Software Design student at Technological University of the Shannon with eight months of commercial software engineering experience at Liberty IT. Experienced developing software using C#, Java, Python and C++, with a particular interest in AI-assisted developer tooling. Seeking graduate software engineering opportunities for 2027.

Work Experience

January 2026 - August 2026 | Intern Software Engineer| Liberty IT

- Investigated LLM-based code evaluation techniques and proposed AI-powered methods for evaluating generated code.
- Delivered a technical presentation on the above research, demonstrating findings to 30+ software engineers.
- Developed production Python/JavaScript scripts used internally by engineering teams.
- Improved application performance by identifying and implementing optimizations.
- Enhanced security through automation and code improvements.
- Collaborated across multiple engineering teams to help introduce an internal Agentic AI Factory.

February 2024 - December 2025 | Catering Staff Member | Supermac's Roscommon

- Maintained extensive knowledge of food, drinks and allergen information.
- Fostered a positive working environment.
- Multitasked to simultaneously support several areas of the restaurant.

Education

- Software Design with Virtual Reality and Gaming | BSc (Hons) | TUS
- Relevant coursework: Software engineering, Programming, Object-Oriented Programming, Algorithms, Algorithmic AI, Generative AI and LLMs, Computer Networks, Agile Software Development, Unity Engine (2D, 3D, VR, AR).

Skills

- **Languages:** C#, C++, C, Java, Python, HTML, CSS, JavaScript, SQL
- **Development Tools:** Git, GitHub, GitHub Actions, AWS, Datadog
- **Practices:** Agile, Waterfall, DevOps, CI/CD, Object-Oriented Programming
- **AI:** Prompt Engineering, Agentic Workflows, GitHub Copilot, VS Code AI Agents

Extracurriculars and Projects

- VR Meteor Simulation: Unity VR application integrating NASA APIs, developed during HackAthlone.
- Games Fleadh Project: Led a team of three developers to build a Unity game that won Best Narrative.

Relevant Accomplishments

- Was on the TUS Dean's Honours List, 2023-2024 and 2025-2026.
- Led a team to win Best Narrative at the Games Fleadh, 2025.
- Won first place in the Broadcom Masters science competition.
